## WORK EXPERIENCE

-  Jul 2015 - Sep 2015 **Junior Web Developer**  
[CleBea, Buea](#)  
Developed web applications for clients. And maintained the attendance management system of the organization ensuring it performed as it was designed to. Also build an application to extract the data from the fingerprint machine to calculate number of absences and attendances each employee has at the end of the month.
-  Jan 2016 - Mar 2017 **Backend Developer**  
[Iventu, Remote](#)  
I worked remotely with an independent employer on an application for remote job search and linking remote workers to employers. Here I was responsible for building the back end with Laravel framework and was also responsible for the configuration of the server and deployment of application.
-  May 2017 - Feb 2018 **Full Stack Developer**  
[Makonjo Media, Buea](#)  
Here, I was responsible for developing the back end of most of the applications using . The company received and developed applications for its clients. Also, I developed REST API's that are utilized by our front end developers. Designed and developed React components for multi platform applications.
-  Jan 2019 - Present **Web Developer**  
[Beyongo Dynamics, Australia](#)  
Build web crawlers that crawl websites for news contents. The crawler was built and maintained with python(scrapy). It crawled news and football websites and populated a database using Laravel framework. Was also responsible for setting up the server where the crawler resides. Designed database used for the storage and retrieval of news crawled from news sites.
